

 **NextStag** | Engage. Innovate. Deliver.

Mission Statement

“To provide communications platforms to businesses around the world to enable them to offer innovative services to their customers”

Who We are?

NextStag is an innovator and developer of next-generation communication suite for IP based protocols. Started by a team of developers in 2007 including IITian onboard, NextStag is a young company with customers and achievements to boast of. NextStag is based in Delhi with development office in Noida. NextStag Communications has the privilege of having Mr. Ashish Banerjee (*Technologist, Solutions & Technology Architecture [Asia & Pacific], Sun Microsystems*) as Mentor in guiding the product development and broad product spectrum and roadmaps.

NextStag has a wide hue of products, ranging from critical backbone server infrastructure till VoIP MiddleWare, SoftSwitch, and Billing Solutions.

As a telecommunication & billing solution provider, NextStag ensures the best ROI on investments by the provider's market offerings by empowering them with best-in-class VoIP Solutions, backed with unmatched support.

In January 2011, NextStag Communications became one of the very few companies to claim the coveted TM-Forum Certification.

What we do ?

NextStag works on Computer Telephony Integration (CTI) area to create and offer IP-communications based products and services to its customer which empower our customers with fulfillment of their communications needs as well as integration with their legacy platforms. Robust solutions from NextStag are powering needs of customers through adoption of Service Oriented Architecture (SOA) and Agile Development Process.

Customer Centric Approach

Customers of NextStag are assigned an Account Manager at the very onset of a project or contract commencement. Customers discuss their issues regarding product or customization discussion with their respective account manager. Our All projects and products are integrated with NSS Platform (NextStag Support) with which the customer can raise a ticket with our NOC and track the progress of the ticket. All contracts are covered with SLAs to ensure peace of mind to you and your business.

NextStag has patronage of over 90 customers in 37 countries.

NextStag Support

NextStag boasts of a 24X7 Network operations center manned by qualified and experienced product engineers to continuously monitor customer's Telecom Infrastructure provided by NextStag and preemptively resolve any potential issues before its occurrence. Clearly defined Escalation filters and escalation process ensures that our customers do not suffer any delay in resolution of their reported issues. NextStag conducts course from time-to-time to train our prized team staff hands-on the technologies and tools used.
