Automatic Number Saving

Instant Callback

Low Latency

Economical for Low Bandwidth Area

## ANI CallBack

### Overview

VoIP Businesses invoke initiate low-cost international & national phone calls by using ANI/CLI CallBack Solution. The ANI/CLI CallBack Solution is ideal for business travelers or you are not able to reachable Internet or VoIP network is accessible in you location.

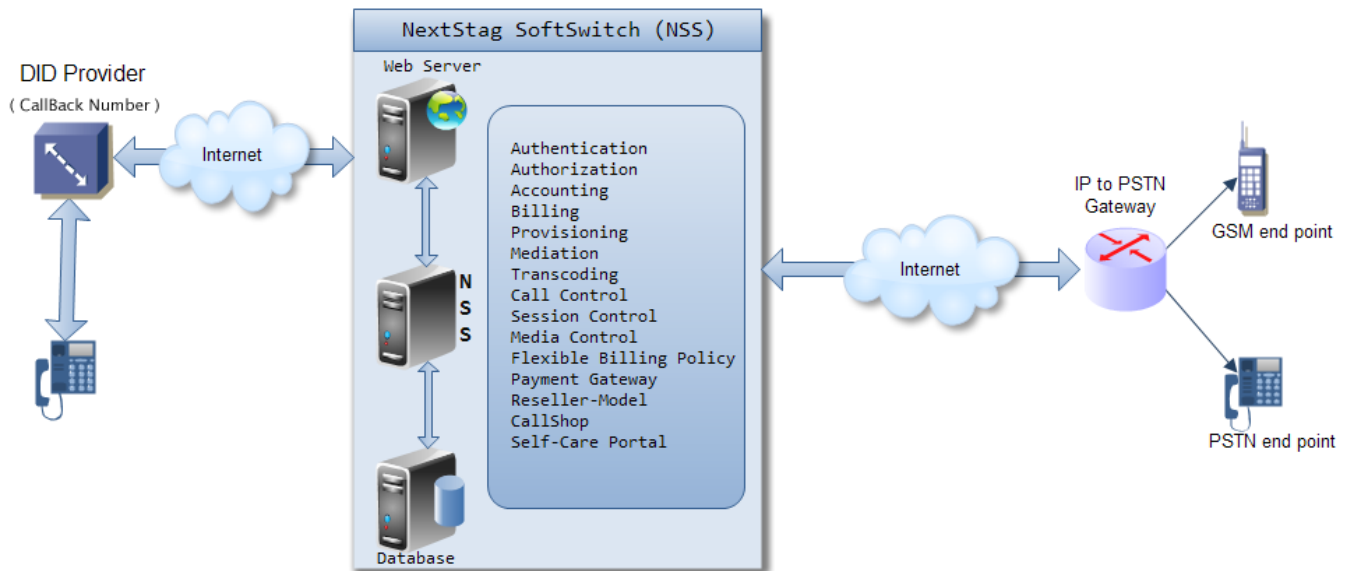

### How it works:

- The user calls an access number (local or international phone number) and hangup call ( ANI callback API disconnects the call without picking up the phone, so that the user is not charged for the call.)
- The user is authenticated by his/her phone number that one store in system.
- ANI API calls back, giving the user a dial tone with IVR message, retrieving the dialed number and establishing a VoIP call with the destination party.

### Web CallBack Features

- Allows customers in locations where international dialing is blocked.
- Allow customers in location voip ports blocked in internet.
- Allow customers in location where customer not reachable internet.
