Economical VoIP Solution for Low Bandwidth Area

## Chat Callback

### Overview

Chat callback is a module for your NextStag VoIP Suite that enables your users to trigger a Callback by sending an message from Jabber enabled chat client(eg:Gtalk). Requirement on provider's part is either a hosted XMPP account or gmail/google apps chat account. The users can send a chat message in a particular format to initiate a callback.

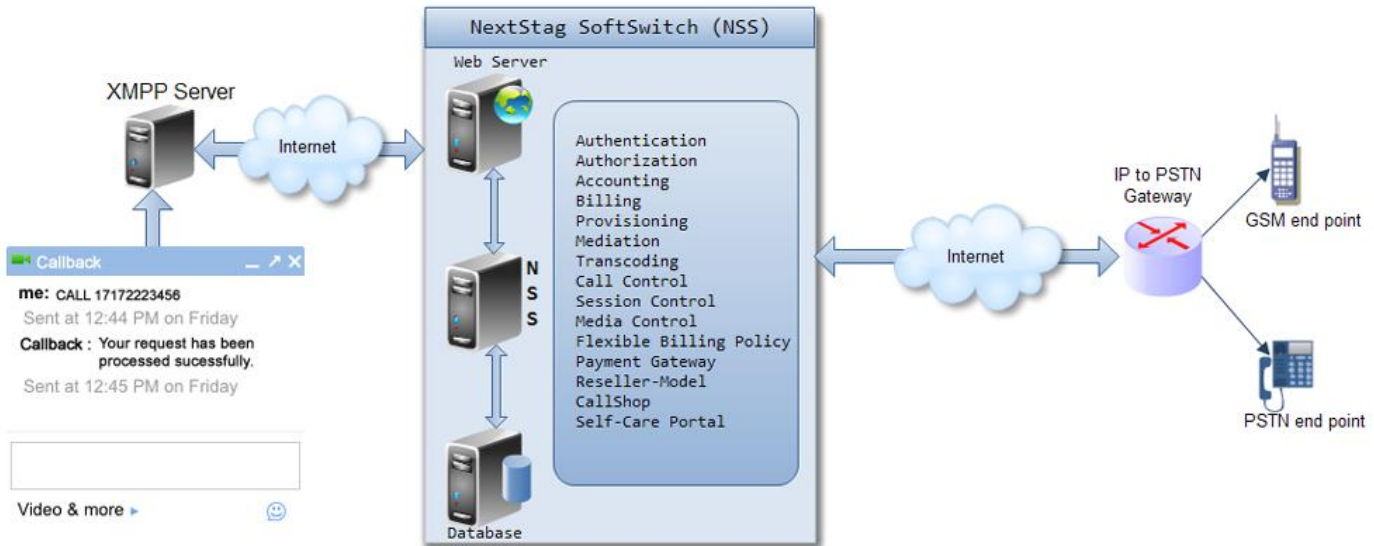

### How it works:

- Add the `callbackbot@provider.com` to your buddy list in gtalk.
- Send a chat message in a particular format to `callbackbot@provider.com` .
- Your phone will ring in a few seconds.
- Enter your destination number when prompted
- You will now be connected

### Features

- Uses only a XMPP account for receiving trigger messages from user.
- Allows customers in locations where international dialing is blocked.
- Allow customers in location voip ports blocked in internet.
- Allow customers in location where customer not reachable internet.
