

# Email CallBack

Economical VoIP Solution for Low Bandwidth Area

Economical VoIP Solution for Low Bandwidth Area  
Supports IMAP/POP Mail Account  
Callback & Balance Display Support

## Email CallBack

### Overview

Email callback is a module for your NextStag VoIP Suite that enables your users to trigger a Callback by sending an email. Requirement on provider's part is an IMAP/POP enabled mail account which can receive emails. The users can send an email in a particular format to initiate a callback.

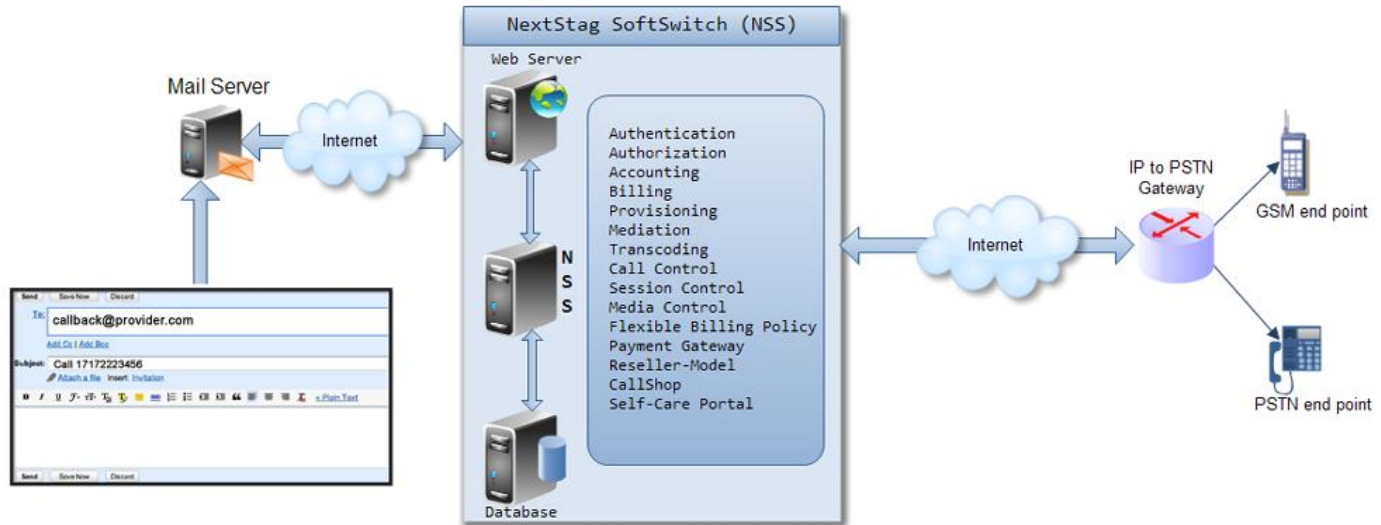

### How it works:

- Send the email in a particular format to the designated email account.
- Your phone will ring in a few seconds.
- Enter your destination number when prompted
- You will now be connected

### Email CallBack Features

- User can be allowed to send from any email account or his authorized email account.
- Only needed is IMAP/POP enabled account to receive emails.
- Allows customers in locations where international dialing is blocked.
- Allow customers in location voip ports blocked in internet.
- Allow customers in location where customer not reachable internet.
