

# SMS CallBack

VoIP Callback using SMS

Configure any number as SMS-Callback Trigger  
Supports inbound SMS Providers  
Complementary Android APP (optional)  
Callback & Balance Response

## SMS CallBack

### Overview

SMS callback is a module for your NextStag VoIP Suite that enables your users to trigger a Callback by just sending a SMS. You, as a provider need to procure an inbound SMS number and point its SMS to HTTP forwarding to your NextStag Platform server. The users can send a message in a particular format to initiate a callback.

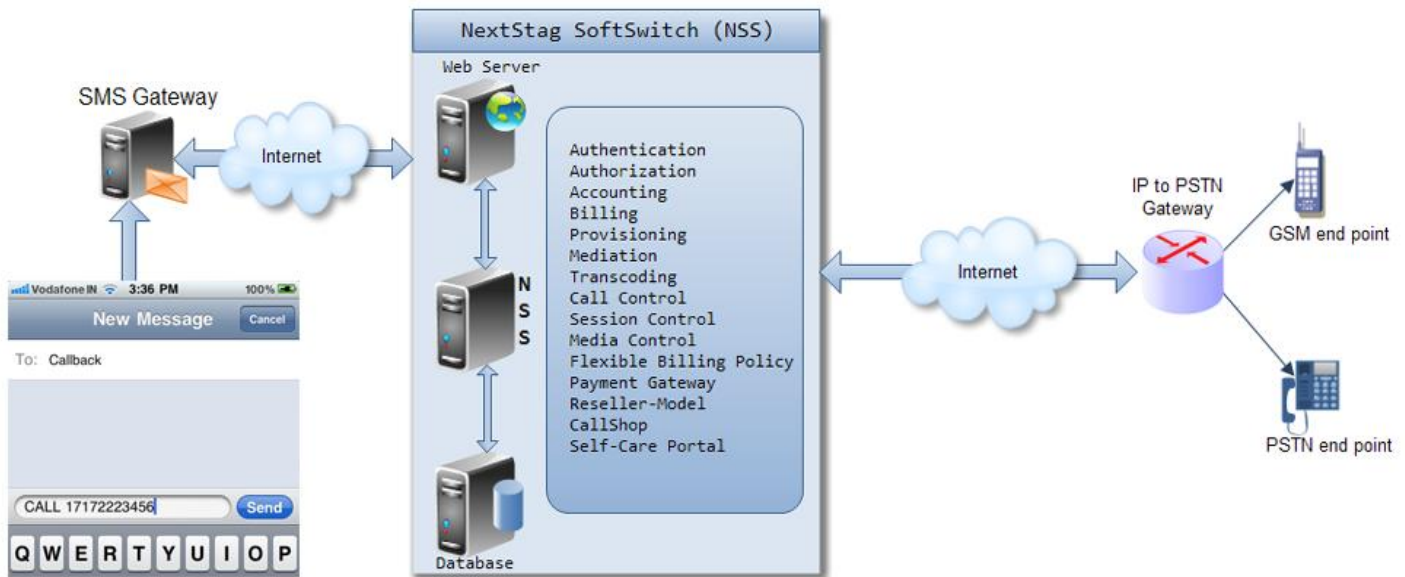

### How it works:

- Send the SMS to the Special mobile number
- Your phone will ring in a few seconds.
- Enter your destination number when prompted
- You will now be connected

### SMS CallBack Features

- Allows customers in locations where international dialing is blocked.
- Allow customers in location voip ports blocked in internet.
- Allow customers in location where customer not reachable internet.
- Only requirement for customer is a mobile device with an active SMS connection.
