Integrated with Billing
Instant Connection

Web Callback

Overview

Web callback is a module for your NextStag VoIP Suite that enables your users to trigger a Callback from within the browser themselves. Parameters required are the phone number of the user where he/she desires to receive the call, and the destination number to which he/she wants to get connected to.

How it works:

- Login in web Callback web
- Enter your phone number
- Enter your destination number
- Click "Call"
- Your phone will ring in a few seconds.

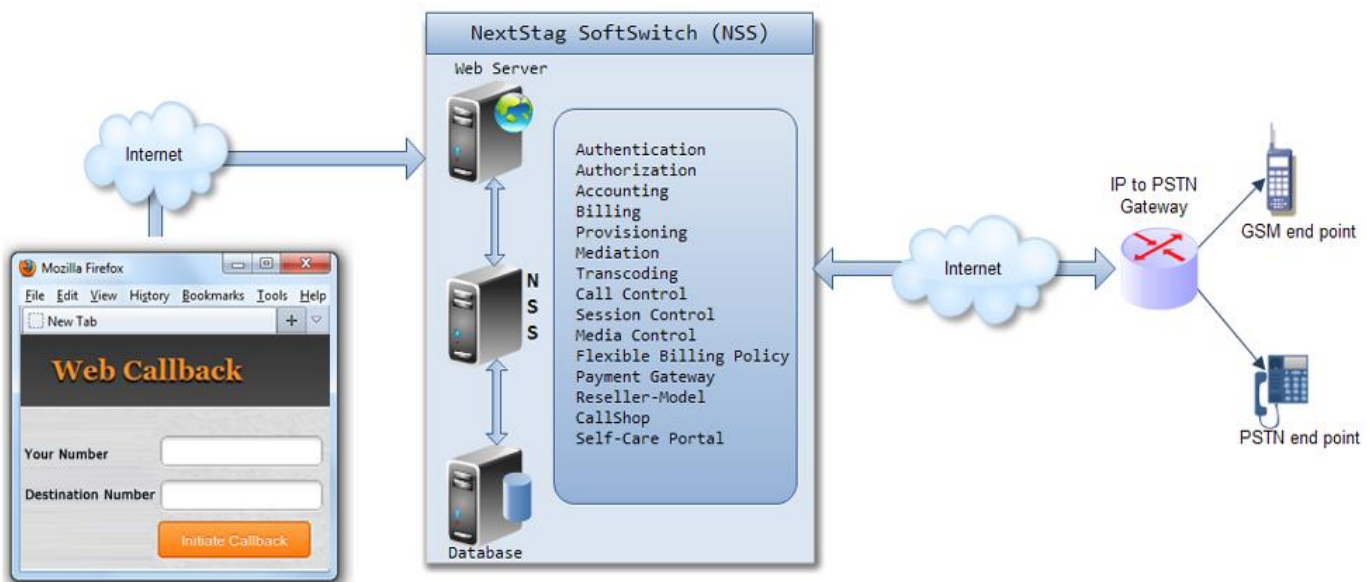

Features

- Allows customers in locations where international dialing is blocked.
- Allow customers in location voip ports blocked in internet.
- Allow customers in location where customer not reachable internet.
- Only software required is a web-browser commonly available in all computers and mobile.

Technical Architecture
